Equal Opportunity Centre in Colleges.

1. Introduction

India is a country of diversity. It is a hub of different religions, castes and cultures. However, the Indian society is characterized by a highly entrenched system of social stratification. It is these social inequalities that created the barriers of denial of access to materials, cultural and educational resources to the disadvantaged groups of society. These disadvantaged groups are SCs, STs, women, OBC (non-creamy layer), minorities and physically challenged persons. It is clear from the demographic factors that a large section of population of our country is still disadvantaged and marginalized.

Rigid compartmentalized caste system forced SCs to be socially deprived to render services without any claim on returns. The deprivation of dignity, identity and rights resulted in their dehumanization and humiliation. The toils and tears of STs were not very different from those of SCs. The STs were isolated, neglected and exploited. Both SCs and STs continue to suffer from social disabilities even today.

Women, victims of the past traditions and customs of the Indian society, were considered to be unequal and inferior. Even today women are being oppressed. Since gender disparity is known to lead to serious social imbalance, it is essential to neutralize these distortions of the past. The minorities including Muslims, Sikhs,

Christians, Buddhists and others, collectively constitute about 19% of the Indian population. The recent report of the Prime Minister's High Level Committee on the social, economic and educational status of the Muslim community of India has clearly indicated that the Muslim community exhibits deficits and deprivation in practically all dimensions of development. The same may be true with some variation in case of the other minorities. The physically challenged persons deserve due place and attention in the demographic setup of the nation. To ensure the same, the Parliament has passed the Act called the Person with Disabilities (Equal opportunities, Protection of Right and Full Participation) Act 1995.

On achieving independence, the nation took a conscious decision to undo the social and historic wrongs. For eradication of social disparities, various provisions were made in the Indian Constitution. Our Constitution enshrined democratization as one of the main objectives of education and anticipated the democratic expansion of education to serve social and economic upward mobility.

The Indian education system seems to have been oriented only to meet the requirement of one-third of the population, ignoring the interest of the rest. Indeed, historically education was confined to certain sections of the society and did exclude large sections of the population, making it highly undemocratic in matters of access. This exclusion in education created ever expanding disparities that adversely affected the disadvantaged groups of the society.

Since higher education is a tool for social and economic equality, the UGC has been addressing national concerns of access, equality, while ensuring the standard of quality and relevance of education by implementing policies of the Government of India and promoting several schemes

and programmes for the disadvantaged groups that would help in eliminating social disparities.

India is potentially rich in human resources. To harvest the same and make the present education system inclusive, the degree of democratization of higher education has to be increased to a large extent. Further colleges should become more responsive to the needs and constraints of the disadvantaged social groups. Therefore, the UGC has planned to establish Equal Opportunity Centres in colleges.
