Abstract

Research plays a significant role in accreditations as well as the competitiveness of the university or colleges, which ultimately enables it to attract top talent in terms of both students and faculty. It has been shown that research productivity is positively correlated with institutional ranking and reputation. The new National Education Policy is based on the pillars of Access, Equity, Quality, Affordability, and Accountability. Inclusion of artificial intelligence, 3D machines, data-analysis, biotechnology etc. in graduate education will create skilled professionals even in cutting edge areas and increase employability of youth. NEP-2020 has made a commitment to funding scholarly research. National Research Foundation (NRF) framed under NEP will look after funding, mentoring and development of high-end research. The strong synergy established between research, academia, and industry is bound to increase and address the global yearning for research and development. Outstanding research through higher education and development is expected through NEP-2020.

Key words:

NEP-2020, National Education Policy, Indian education system, Higher Education, Research, National Research Foundation

Introduction

The generation of new information is one of the goals of higher education, always with the intention of instructing and
